

NEURO-2025

INTERNATIONAL NEUROSCIENCE CONFERENCE

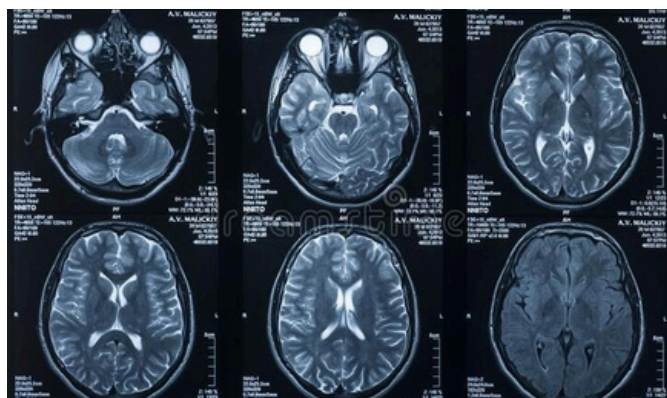

29-30 NOVEMBER 2025
TBILISI, GEORGIA.

Why Take Part?

The INTERNATIONAL NEUROSCIENCE CONFERENCE (NEURO-2025) is one of the largest international event annually in the field of neuroscience in Georgia. The NEURO 2025 will provide a unique opportunity to meet the best experts and scientists from the entire world, promote your organization, support your brand and maintain a high profile within your field of business. The organizers extend a warm invitation also to educational centers, universities, publishing houses, local societies or NGO's to demonstrate their activities and research by participating in this conference.

It is our pleasure to welcome you to the International Neuroscience Conference (NEURO-2025), which will take place from 29-30 November 2025 in Tbilisi, Georgia. NEURO-2025, the largest international neuroscience meeting in Georgia, will be held under the slogan **"Shaping the Future of Neuroscience Together"**. NEURO-2025 promises to be an inspiring and intellectually stimulating event that brings together leading minds from around the world to explore the frontiers of neuroscience.

The NEURO-2025 conference will be held in conjunction with **the 6th Annual Meeting of the International Center for Neuroscience Research in Georgia**, will feature a comprehensive program that includes keynote speeches, cutting-edge presentations, engaging panel discussions, and interactive sessions.

This gathering serves as an exceptional platform for professionals, researchers, and experts to network, share their latest research findings, and foster collaborations that will drive the field of neuroscience forward. We are excited to delve into three main themes:

Theme 1: Decoding the Diseased Brain: Neurochemical Pathways, Early Markers, and Precision Diagnostics (Explore how the latest breakthroughs in brain chemistry and biomarker discovery are transforming early detection and personalized diagnosis of neurological and psychiatric diseases).

Theme 2: Brain Circuitry and Cognition: From Computational Models to Therapeutic Innovation (From neural networks to real-world treatments—this theme fuses computational brain models with therapeutic innovation to reshape how we understand and treat cognitive disorders).

Theme 3: Converging Neurotechnologies: Restoring Function and Re-Engineering Brain Health (Discover how brain-machine interfaces, neurostimulation, and emerging tech are restoring lost functions and redefining what brain health means in the 21st century).

We look forward to your active participation and contributions to the program through abstract submissions for oral and poster presentations.

Looking forward to meeting you in “NEURO-2025” in beautiful Tbilisi!

**Warm Regards,
The Organizing Committee of NEURO-2025**
